

ENRICHMENT ACTIVITY

Consider This: Your Turn: Internet Service Summary

Apply your creative thinking and problem-solving skills to design and implement a solution.

Instructions Part 1: You and your friend have decided to subscribe to a new Internet service provider. You would like to maximize services while keeping costs low. Research and find three Internet service providers in Rapid City.

For each company, find the **best service package** as well as the **basic service package**. Using the cost figures you find, calculate the cost per month for each service for a year. Include totals, minimum, maximum, and average values. Use the concepts and techniques you have learned up to this point in order to create and format the worksheet. You need to incorporate formulas/functions. No formulas| functions = No Points. The more you incorporate the more points you can earn!!

Instructions Part 2: Which companies did you choose for your report? Which company offered the best deals that you would be willing to use? Place your answers in a Word document.
