

Animation Final Project

Create a folder **LastName Animation Final Projects**.
Save all of your photos and project files you use/create in this folder!

Picture Requirements

- ✓ You need to combine/use **4 different pictures** and at least **1 text item** to create one image/project.
 - 1 picture needs to come from either the scanner or digital camera
 - Your pictures must go together to create a convincing animation
 - ✓ AKA...no randomness
 - You will “build” your project in Photoshop first before you animate.
 - ✓ Create all the layers, picture sizes, styles and text needed and then ANIMATE!

Animation Requirements

- ✓ You need to create at least 25 frames for your animation.
- ✓ An object needs to **GROW** or shrink (just like the fruit project)
- ✓ An object or text needs to fade in/out
- ✓ Animated Text (Fade in/out) would count here as well
- ✓ I should also see you utilizing the knowledge you gained in the Animation chapter.
 - Frame-by-frame movement and tweening
 - **Save as LastName Final Project.psd**

Saving and Exporting Requirements

- ✓ When finished with your project – you will have 2 files saved into your folder.
 - **LastName Final Project.psd**
 - **LastName Final Project.gif**

You are graded on the criteria listed above; however, a majority of your grade will be determined by the final appearance and the amount of time and effort put into this project. **Meaning your pictures should go together (theme) not just randomness! Objects should move realistically 😊**
